PROJECTS

Amazon Website Frontend Clone | HTML, CSS, JAVASCRIPT

Feb 2024

- Replicated the layout, design, and functionality to mimic the original website's user interface and experience.
- Designed and implemented a responsive layout to ensure compatibility across various devices and screen sizes.
- Employed CSS for styling, including intricate layout details and visual elements to match the original website.

Apple Website Frontend Clone | HTML, CSS, JAVASCRIPT

Jan 2024

- Recreated the layout, design elements, and interactivity to closely resemble the original website.
- Designed and implemented responsive layout to ensure compatibility across various devices and screen sizes.
- Utilized CSS for styling, including animations and transitions to enhance user experience.

Pet App - University Project for Real Clients | Flutter, FastAPI, PostgreSQL, Amazon S3

Sept 2023 - Dec 2023

- Collaborated within a 5-member team to design and implement a feature-rich Android application.
- Led the design of most of the front end, ensuring the app boasts a polished UI/UX design, and conducted comprehensive UI testing to ensure optimal user experience.
- Implemented Google Maps API to facilitate precise event location tracking and enhance navigation capabilities.
- Assumed the role of Product Manager and optimized the end-to-end process from conceptualization to implementation for seamless execution.
- Achieved 90% of the project scope for this MVP, creating a fully functional app.

Habit Tracking App - University Project | Java, Android Studio, Firebase

Sept 2021 - Dec 2021

- Collaborated with a group of 6 to design and develop a fully functional app.
- Designed and implemented user friendly interface to enhance user experience and engagement.
- Used Firebase for real-time data synchronization, authentication, and storage.

PROFESSIONAL EXPERIENCE

Intern BT - Operations | Alberta Investment Management Corporation | Edmonton, AB

May 2023 - Present

- Developed a Python script to automate server list synchronization with Database records, achieving a 90% reduction in manual effort.
- Authored a Python script for seamless data import into CMDB, leveraging Azure Pipelines for automation.
- Wrote a SQL script to expedite user data population post-database refresh, cutting processing time by 80%.
- Architected and executed an Azure pipeline to automate Database refresh.
- Contributed to environment cleanup initiatives, ensuring optimal system hygiene and efficiency.

E-Commerce Associate | Walmart | Edmonton, AB

Sept 2020 – June 2023

- Worked in a fast-paced environment usually having around 100 deliveries per day.
- Improved time-management skills by completing deliveries to customers at the pick-up location within 5 mins.
- Demonstrated problem-solving skills by attending to customer complaints and ensuring their satisfaction.

EXTRACURRICULAR

Social Media Manager – Google Developers Students Club

Sept 2021 – May 2022

- Produced engaging content to highlight club activities and achievements.
- Demonstrated strong leadership, teamwork, and communication skills by working with other team members to align social media efforts with broader organizational goals.
